Your regular update (February 2014)

Please check our updated status, and the progress on accrued data below.

The core team would like to extend a warm welcome to:

- ⌘ Our new CRA in Singapore who has started with great enthusiasm after successful EDC training.
- ⌘ Our two new team members in Rochester which are going through training at the moment. We are very much looking forward to welcoming them to the team

We would like to update you:

On the excellent work in re-consenting rates from the following sites:

- ⌘ **University Hospital Messina**
- ⌘ **National University Hospital, Singapore**
- ⌘ **Barts Health NHS Trust**
- ⌘ **Bronglais General Hospital**

They have re-consented the majority of their population and are still working on achieving 100% rates where possible. They are now working hard to maintain up to date data entry for their sites. As you can see within the status reports the amount of long-term data has increased substantially since our last update.

Your regular update (February 2014)

On the excellent work in query resolution for the following sites:

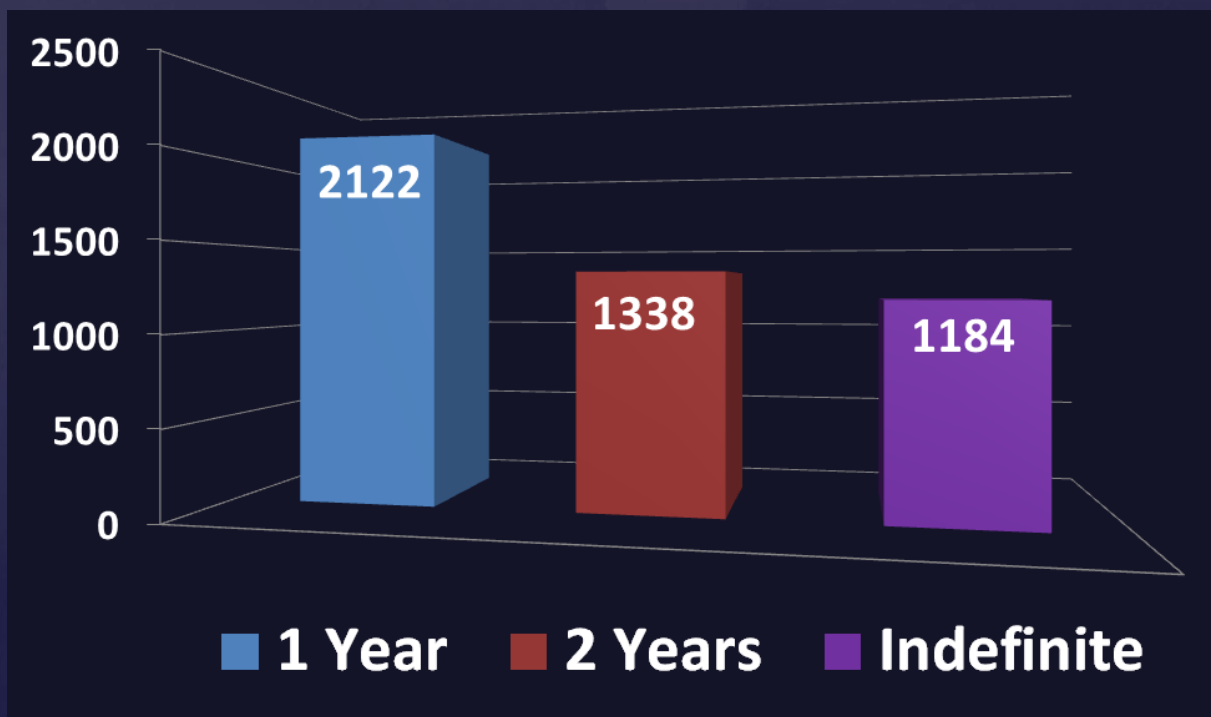

- ⌘ **National University Hospital, Singapore**
- ⌘ **3 Counties Cancer Research Network**
- ⌘ **Barts Health NHS Trust**

Their query resolution rates are all very close to 100%.

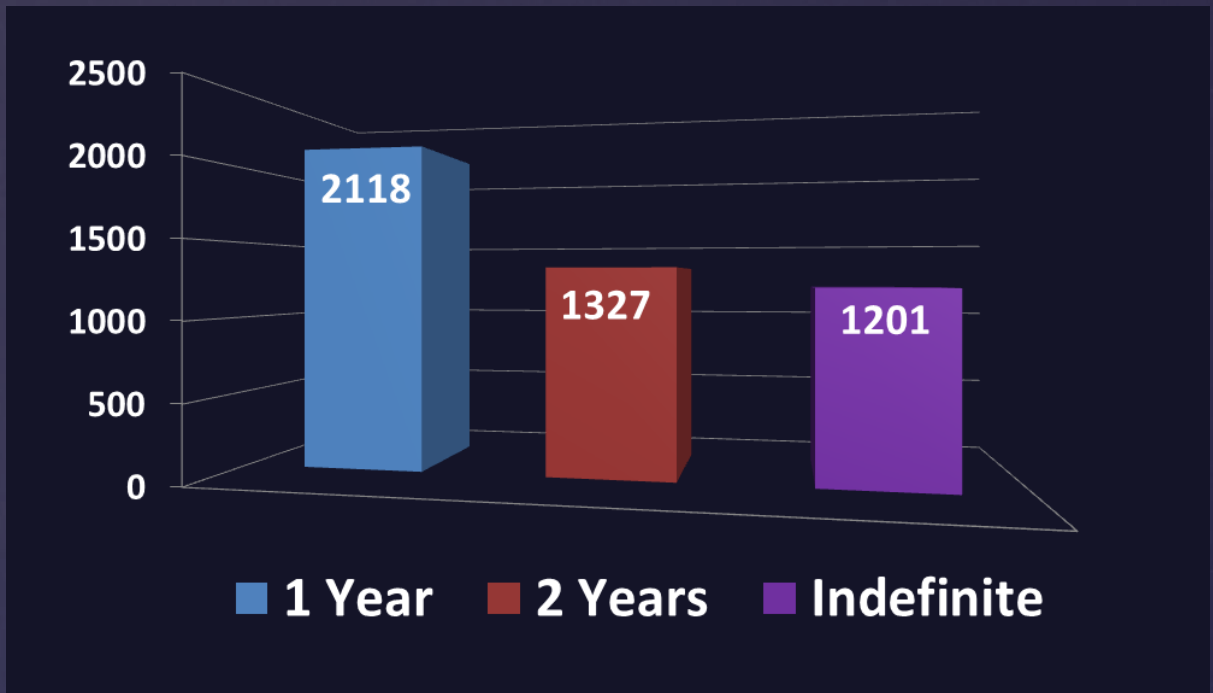

Special mention to

- ⌘ **University Hospital Messina** For their improved strategy on query resolution with very good progress on that front.

Study population Per follow-up type (February 2014)
