

Newsletter 2. **December 2005**

We are pleased that PERCEIVE has now recruited over 600 patients and now have 4 sites actively recruiting.

We are please to welcome the team at the 3 Counties Cancer Research Network, UK, who were activated on 17th November.

Perceive has been submitted for ethical/IBR approval in an additional 5 sites with a further 4 in the process of submitting ethics/IRB.

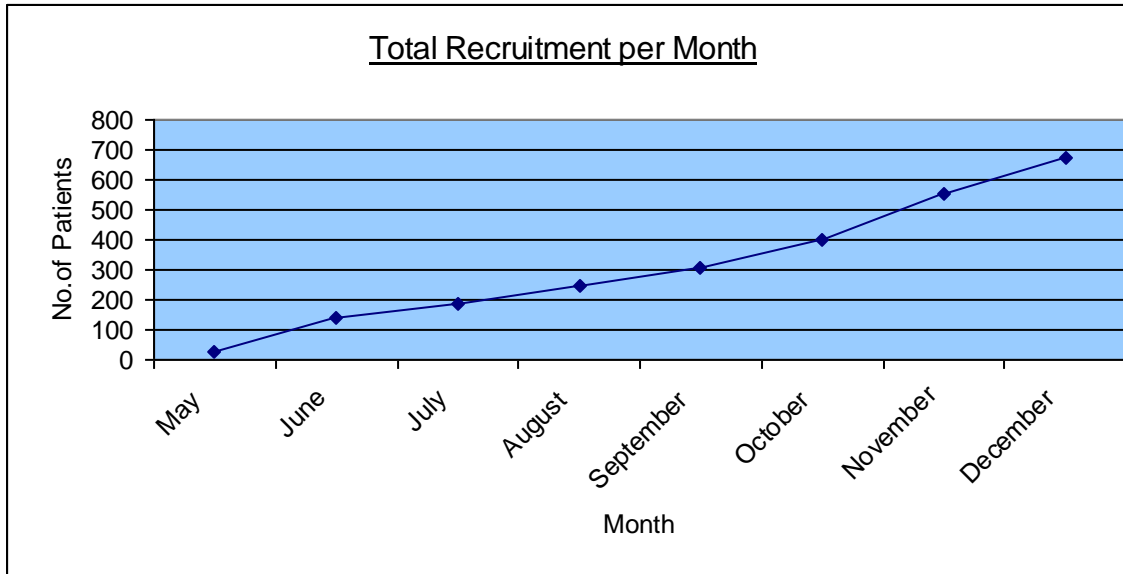

We are still looking for additional sites and would ask all investigators that if they are aware of interested or suitable sites within their country to contact us.

We are pleased with the Medidata system and are encouraged by reports of its user friendly data entry system. We are aware of a problem with the blood page (currently flagging bloods as out of range) and are in the process of correcting this. If there are any problems please email us.

We wish you all the best season greetings and look forward to a successful year of recruitment.

The PERCEIVE Study Team.
